COURSE DESCRIPTION

The purpose of this course is to provide a basis for recognition and modern management of complex trauma and musculoskeletal injuries. The course is an intensive three and a half days of sessions, with a series of lectures and discussion which include specialized hands-on workshops.

COURSE OBJECTIVES

Designed to offer the orthopaedic surgeon an integrated approach to trauma management. At the conclusion of this symposium, participants will be able to:

- Assess current concepts in the initial management of spine and pediatric trauma.
- Demonstrate evolving surgical techniques and implant technologies through didactic and hands-on workshops.
- Assess current concepts in the initial management of pelvic and acetabular fractures.
- Assess current concepts in the initial management and develop treatment options for complex lower and upper extremity injuries.
- Debate and critique current thinking and utilization of orthobiologics.
- Identify current methods for management of foot and ankle trauma.

ACCREDITATION

Advocate Health Care is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

Advocate Health Care designates this educational activity for a maximum of **30.5 AMA PRA Category 1 CreditsTM**. Physicians should only claim credit commensurate with the extent of their participation in the activity.

Acknowledgement of all disclosures i.e., nothing to disclose or existence of relevant financial relationships will be made at the activity. Conflicts of interests will be identified and resolved prior to the activity.
